A COMPANY
FOR LIFE

Meds[®]

A COMPANY FOR LIFE

means we're here for the long term. With MEDS you get more than a contractor. You get a partner.

Our mission is to help you deliver the highest quality care to your community in a cost-effective way. So we work tirelessly to deliver optimal patient care and utilize our expertise to achieve operational and departmental excellence, knowing that by doing our job right, we'll earn your trust and become a valued business partner.

For over 30 years, MEDS has partnered with regional, rural, and critical access hospitals by providing physician staffing and management solutions.

MAKING IT HAPPEN

Today, we provide the management and staffing services to multiple facilities treating over 200,000 emergency medicine, hospital inpatient, telemedicine, and urgent care patients throughout the Midwest.

Our commitment to efficient high quality health care, supported by our accessibility, responsiveness, and management expertise, helps us deliver personalized excellence that larger competitors can't match.

Our first client was St. Elizabeth's Hospital in Belleville, Illinois in 1983 and they are still with us today!

OUR PERSONALIZED APPROACH

Our management and operational approach blends the staffing of Emergency Departments, Urgent Cares, and/or Clinical Decision Units in an integrated fashion to deliver the right care at the right time.

By focusing on maximizing emergency department performance through efficient staffing, resource utilization, and clinical protocols we work to prevent unnecessary care as well as right size care and associated costs for patients, hospitals, and payors.

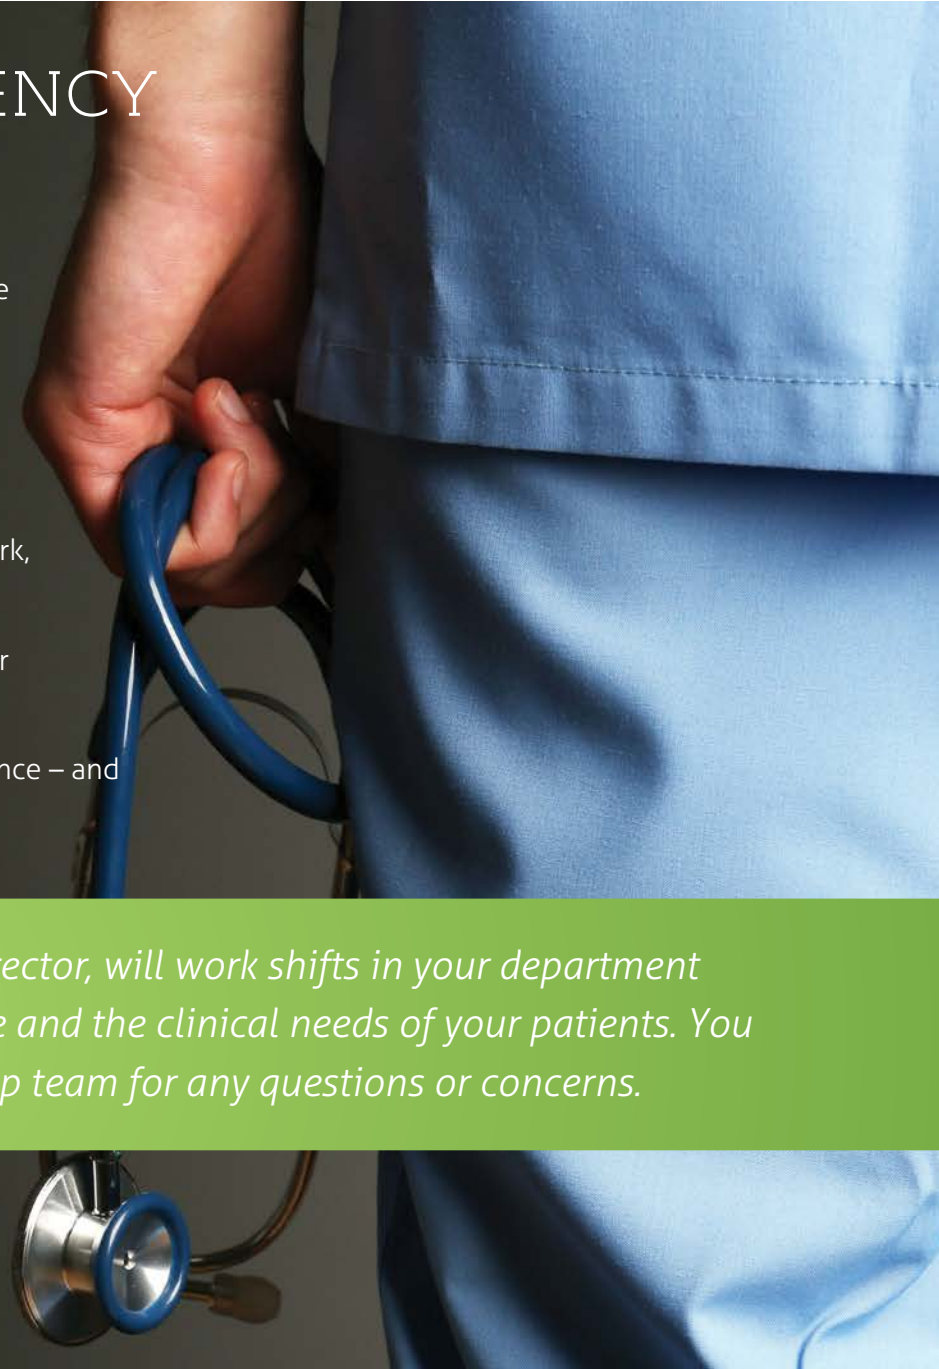

Typical results include:

- Improved job satisfaction for physicians, nurses, and ancillary staff
- Improved patient outcomes and satisfaction
- Improved emergency department productivity and operations
- Decreased physician stress and burnout related to staffing optimization strategies

STRUCTURING YOUR EMERGENCY DEPARTMENT FOR SUCCESS

- Establishing a Medical Director who is responsible for cultivating a culture of excellence and accountability within your emergency department.
- Building a premier team of emergency physicians and advanced practice providers with the appropriate clinical experience that matches your hospital volume, acuity, and community.
- Driving staff satisfaction and morale through optimal scheduling, teamwork, and collaboration.
- Fostering meticulous documentation among our clinicians to support your compliance efforts and maximize reimbursement.
- Using metrics to identify factors that negatively impact your ED performance – and addressing these factors in order to optimize patient flow.

Our Chief Medical Officer, who mentors your Medical Director, will work shifts in your department assessing the processes from both a physician's perspective and the clinical needs of your patients. You will always have direct access to the MEDS Leadership team for any questions or concerns.

"MEDS is a physician owned and managed company for a reason. We believe that management by physicians versus a board of directors or investor group is in the best interest of our patients and our providers. Our investment is in our patients and the providers that work with us. We know our providers personally and they are not just names filling shifts on a schedule. Our goal is to become a "Company for Life" to our client partners and provide the best care possible for our patients and work environment for our colleagues and friends."

Len Glover, DO, FACEP

BUILDING YOUR TEAM OF EMERGENCY PHYSICIANS AND ADVANCED PRACTICE PROVIDERS

We help create a practice environment that aligns incentives and enables providers to use their skill set in a collaborative environment with ongoing feedback using data analytics and operational insights.

- Leadership development programs for our Medical Directors that include mentoring, training, and ongoing education.
- Provider schedules and coverage models developed to match patient volume and flow
- Quality management strategies based on reporting intelligence that improve ED efficiency, patient outcomes, and patient satisfaction.
- Patient safety programs and risk management initiatives centered on building awareness and improving patient evaluation and documentation.
- Compliance support designed to help meet regulatory requirements and mitigate risk within your ED.
- Billing and coding services to help improve reimbursement and maintain compliance
- Patient satisfaction tools and resources that help target common complaints and provide feedback to our providers.
